Embrace:CT™
Multi Atlas Contouring

Embrace:MR™
Multi Atlas Contouring

CONSISTENT CONTOURS.
AUTOMATED.
Multi-modal autocontouring

Supporting your CT and MR contouring needs
Between atlases provided for the major anatomical sites and the ability to create atlases from your own cases, the Embrace workflows enable you to autocontour any structure in the body. As well as contouring your CT cases, Embrace can contour on MR without imposing a particular MR sequence.

Anatomy matching multi-atlas

Increasing efficiency for delineation of organs-at-risk
The combination of Mirada’s deformable image registration engine and its true multi-atlas technology provides industry-leading accuracy for atlas-based autocontouring, including robustness to variations in patient anatomy.

With Embrace atlas contouring, you only need 10-20 atlases to achieve peak performance. Additionally, it only takes a few clicks to add your own cases to new or existing atlas libraries.

Integration Into Treatment Planning

Zero-Click™ Automation
Embrace:CT and Embrace:MR are available on Mirada’s unique Zero-Click platform Workflow Box™, which automates complex radiation therapy imaging workflows and integrates with your PACS and TPS. This platform provides background processing and seamlessly delivers the images and associated contours to your planning workstation. Embrace’s contours can then be validated using your existing TPS or Mirada’s RTx™ software solutions for radiation oncology.
Embrace:CT and Embrace:MR use Mirada’s unique, proven multi-atlas technology to deliver fully-automated organs-at-risk contouring. As well as improving efficiency, effective atlas-based contouring helps you adopt and adhere to standardized contouring protocols in your RT department.

- Consistently contoured organs-at-risk
- Reduce contouring bottlenecks
- Create more contours in less time
- Increase automation in treatment planning

“We have chosen Mirada as a partner to bring efficiency gains across all our sites with their automated contouring solutions, and to support the implementation of complex treatment protocols thanks to their multimodality image fusion platform. The flexibility of their software will facilitate the implementation in the existing clinical workflows of our different sites.”

Service and Upgrades
Mirada Medical is passionate about providing world-class customer service. We offer a dedicated telephone support line, as well as an email option to keep you in touch with our support staff. Committed to providing you with rapid responses to your queries, our experienced clinical and technical specialists work together to swiftly resolve any customer support issue you raise.

Updates are routinely provided at no cost to our service customers, meaning you always have access to our latest products and features.

Training
We appreciate how important good training is in enabling you to make the most of your investment. Available for on-site or remote education, Mirada’s experienced team will tailor a training package to suit your institution’s needs and ensure all your staff members are comprehensively trained.

“In addition to their exceptional software, the value of Mirada Medical products is enhanced by their support team. Armed with years of experience in the clinical setting and software development, the staff is always friendly and courteous, focused on customer service and quick results. Their service begins with installation and training. It is enhanced with Mirada’s online support page where our users are able to find answers to common questions and user guides. In the event where we would require immediate support, help is only a phone call away. Remote access to the software puts their staff in the driver seat, giving them the ability to view our workstations and make changes as needed for our users.”
