Re:Contour™
Adaptive and Replanning

AUTOMATED CONTOURING FOR REPLANNING
Consistency across plans

**Following contouring style and conventions**

Re:Contour uses your contours and, as a result, adheres to your protocols, suits your preferences, and follows your guidelines.

It also recreates names, colors and other structure attributes, meaning that they still follow your conventions and protocols.

---

Adaptive autocontouring

**Increasing efficiency for delineation of organs-at-risk**

With Deformable Image Registration (DIR), Re:Contour creates contours for your new planning CT by deforming contours from the previous plan.

Mirada’s world class adaptive image registration is robust to variations in patient anatomy, leading to contours that consistently require minimal editing leading to great time savings in an adaptive planning workflow.

---

Integration Into Treatment Planning

**Zero-Click™ Automation**

Re:Contour runs on Mirada’s unique Zero-Click platform Workflow Box™, which automates complex radiation therapy imaging workflows and integrates with your PACS and TPS. This platform provides background processing and will typically deliver results ready for when you arrive at your planning workstation. Re:Contour’s results can then be validated using your existing TPS or Mirada’s advanced RTx™ software.
As well as improving efficiency, Re:Contour’s effective multi atlas-based contouring helps you adopt and adhere to standardized contouring protocols in your RT department. By using Mirada’s unique adaptive image registration technology, Re:Contour delivers fully automated organs-at-risk re-contouring for adaptive therapy and re-treatment cases.

- Ready for review and approval
- No more contouring bottlenecks
- Consistently contoured organs-at-risk
- More contours, less contouring

“We chose Mirada because their contouring solution allows us the flexibility to push boundaries in research whilst using robust workflows we can trust in a clinical setting as well. With growing patient numbers and treatment complexity, increasing efficiency and flexibility whilst improving quality and precision has become imperative.”

Service and Upgrades

Mirada Medical is passionate about providing world-class customer service. We offer a dedicated telephone support line, as well as an email option to keep you in touch with our support staff. Committed to providing rapid responses to your queries, our experienced clinical and technical specialists work together to swiftly resolve any customer support issue you raise.

Updates are routinely provided at no cost to our service customers, meaning you always have access to our latest products and features.

Training

We appreciate how important good training is in enabling you to make the most of your investment. Available for on-site or remote education, Mirada’s experienced team will tailor a training package to suit your institution’s needs and ensure all your staff members are comprehensively trained.

“In addition to their exceptional software, the value of Mirada Medical products is enhanced by their support team. Armed with years of experience in the clinical setting and software development, the staff is always friendly and courteous, focused on customer service and quick results. Their service begins with installation and training. It is enhanced with Mirada’s online support page where our users are able to find answers to common questions and user guides. In the event where we would require immediate support, help is only a phone call away. Remote access to the software puts their staff in the driver seat, giving them the ability to view our workstations and make changes as needed for our users.”
